Objective

Software Developer with 1 year of experience in backend and AI-based application development. Skilled in Python, PHP, and modern frameworks like LangChain and FastAPI. Seeking to apply strong analytical and Technical skills to deliver innovative, scalable solutions that add business value.

Experience

Junior Software Developer – MVG Digital Consulting Pvt. Ltd. (Oct 2024 – Present)

- Developed and maintained server-side applications using Python and PHP.
- Built scalable REST APIs, integrated MySQL databases, and optimized performance.
- Implemented LangChain-based LLM solutions for document search, summarization, and Q&A chatbots.
- Gained hands-on experience in Machine Learning, NLP, and backend integration.

Projects

1. Intelligent Reference Management & Keyword Analysis Tool

- Extracted titles from research citations and generated keywords using LLMs.
- Processed DOCX/DOC research papers with SpaCy and Regex for NLP tasks.
- Built keyword comparison modules for exact and broad match detection.
- Delivered structured citation outputs for improved academic referencing.
- Tech Stack: Python, LangChain, Pandas, SpaCy

2. Multi-Discipline Class Management System

- Built a role-based authentication system using Keycloak for Students, Teachers, Parents, and Admins.
- Designed and implemented REST APIs for managing classes, users, fees, and schedules.
- Integrated MySQL with PHP/CodeIgniter 4 for secure data handling.
- Enabled automated WhatsApp notifications for user communication.
- Tech Stack: PHP, CodeIgniter4, Keycloak, MySQL

Technical Skills

- Languages: Python, PHP
- Frameworks: Flask, FastAPI, LangChain, CodeIgniter4
- Databases: MySQL, Weaviate, FAISS
- Tools: Git, Docker, Postman, GROBID, Keycloak

Education

B.E – Mechanical Engineering, Anna University Regional Campus, Madurai (2020 – 2024)
CGPA: 7.8
